

Calculate the **area** of the shape below. All measurements are given in mm. Do not scale.

To Calculate the Area of Shape:

$$\begin{aligned} \text{Area}_{\text{Total}} &= \text{Area}_A + \text{Area}_B \\ &= (l_A \times w_A) + (l_B \times w_B) \\ &= (80.4 \times 39.6) + (40 \times 20) \\ &= 3183.84 + 800 \\ &= 3983.84 \text{ mm}^2 \end{aligned}$$
