Problems:
15. Three trucks carry $5,829.84 \mathrm{~kg}, 492.9 \mathrm{~kg}$ and 17 kg of cargo. How much cargo do they carry altogether?
16. The flow into a pipe originates from three smaller pipes. Each minute, 200 gallons, 750.89 gallons and 12.7 gallons flow from each of the smaller pipes. How much water flows through the larger pipe in:
i. $\quad 1$ minute?
ii. 7 minutes?
iii. $\quad 12$ minutes?
17. Find the total amount for the following:
£2.94, £183.87, £9, £9.67, 82p and $£ 12$.
